Section 5. Terms of Reference

1. BACKGROUND

Global attainment of the SDG goal of affordable and universal clean energy access remains a key priority for the International Solar Alliance (ISA). The ISA is committed to facilitating solar energy deployment to remote and inaccessible communities in Pacific Island States as a key driver of inclusive growth and gateway to abating climate change.

The ISA, in keeping with its 5-year strategic plan to deliver relevant programmatic support to member countries to accelerate the adoption of solar energy, therefore aims to provide technical assistance and regulatory support to its member states in establishing sustainable and viable solar-receptive regulatory frameworks.

2. Project Title

Developing appropriate regulatory frameworks for sustainable and scalable solar energy systems in Pacific Island States.

3. Project Description

The project will be a broad-based flexible engagement designed in line with each country's assessed and requested needs in close cooperation with the relevant government agencies and/or Ministry (s). The project will focus on key policy and regulatory actions to expand solar energy development in the short and medium term using least-cost strategies to ensure energy security and combat climate action in the focus countries.

The project's focus will be two-fold – recommending business models with least-cost strategies for accelerating the development of requisite policy, and developing requisite regulatory frameworks for scalable and sustainable solar-energy deployment in each country.

4. Project Vision

The project deliverables will be in phases. For each country, it will commence with-

- The initial phase of comprehensive research to assess existing and emerging policy and legal and institutional issues relating to deploying solar energy in the country.
- The second phase will be the recommendation of least-cost strategy business models for the acceleration of solar energy penetration and scale.
- The last phase will be developing requisite energy policy or regulatory frameworks for least-cost strategies for sustainable solar-energy deployment and scale in each country.

This support will be a high-level policy and regulatory support targeted to suit each country's regulatory, financial, and socio-political needs.

5. Scope of Work

ISA has identified certain countries- Fiji, Samoa, Vanuatu and Tonga² (**Potential Countries**) to serve as focus countries for the regulatory support at this time.

Based on the response and interest of countries, additional countries may be included in the assignment, to a maximum of ten (10) countries.

In addition to the phases detailed under Paragraph C above, the successful contractor would:

- a) Conduct comprehensive and qualitative research and analysis of existing and emerging policy/regulatory frameworks relating to solar energy in the aforementioned countries (and additional countries where included) and prepare a report on the gap analysis for existing, potential, and/or policy/regulatory constraints to sustainable mini-grids and other applicable solar systems like solar pumps, solar rooftops, etc. in the focus countries.
- b) Support and participate in ISA events and programs to engage with other stakeholders in ISA member countries on discourse or modalities for regulatory support. This support may include drafting position papers, presentations, talking points, and/or physical travel to the destinations.
- c) Identify opportunities, recommend and develop suggested business models for least-cost solar development strategies in the solar systems of focus in the countries.
- d) Support ISA on ISA country missions to engage with Stakeholders in the countries of focus for regulatory support. This support may include training, capacity building, drafting position papers, presentations, talking points, and/or physical travel to the destinations.
- e) Provide practical recommendations for requisite enabling regulatory frameworks to incentivize investments and engender mini-grid deployments and the adoption of other solar systems as commercially viable sustainable projects in the Potential Countries.
- f) Deliver two comprehensive regulatory framework as identified for establishment in the select countries.

6. Expected Outputs

- a) A detailed analytical report on Solar Energy in Pacific Island states covering the regulatory frameworks of the Potential Countries, detailing the Scope of Work in paragraph D above and their impact on solar-energy solutions deployment in the country. This report will include recommendations on plausible approaches or strategies for regulatory and policy changes or amendments to promote mini-grid and solar energy sustainable least-cost strategies or business models.
- b) Develop a pipeline of recommendations categorized into immediate, short-term, medium-term, and long-term products to accelerate the development of least-cost strategy business models for accelerating solar energy penetration and scale in each country.
- c) Design a comprehensive policy and regulatory framework for sustainable solar energy integration in the Potential Countries. This last phase is to develop at least two requisite energy solar energy regulatory framework for least-cost strategies for sustainable solar energy deployment and scale in each country. The envisaged task will include a practical hands-on approach to drafting or redrafting

² The Potential Countries identified are tentative only. The country will be finalized based on the willingness of the country.

energy regulations and/or new policies and/or regulations as required by the exigencies of each country’s government for adoption by the Potential Countries.

- d) Conduct an average of 3 – 5 workshops in the country for training and building capacity of the relevant stakeholders before or after designing the regulatory framework based on the need and request of the country.
